

AIAI CUSTOMER COUNTRY WIDE ANALYSIS

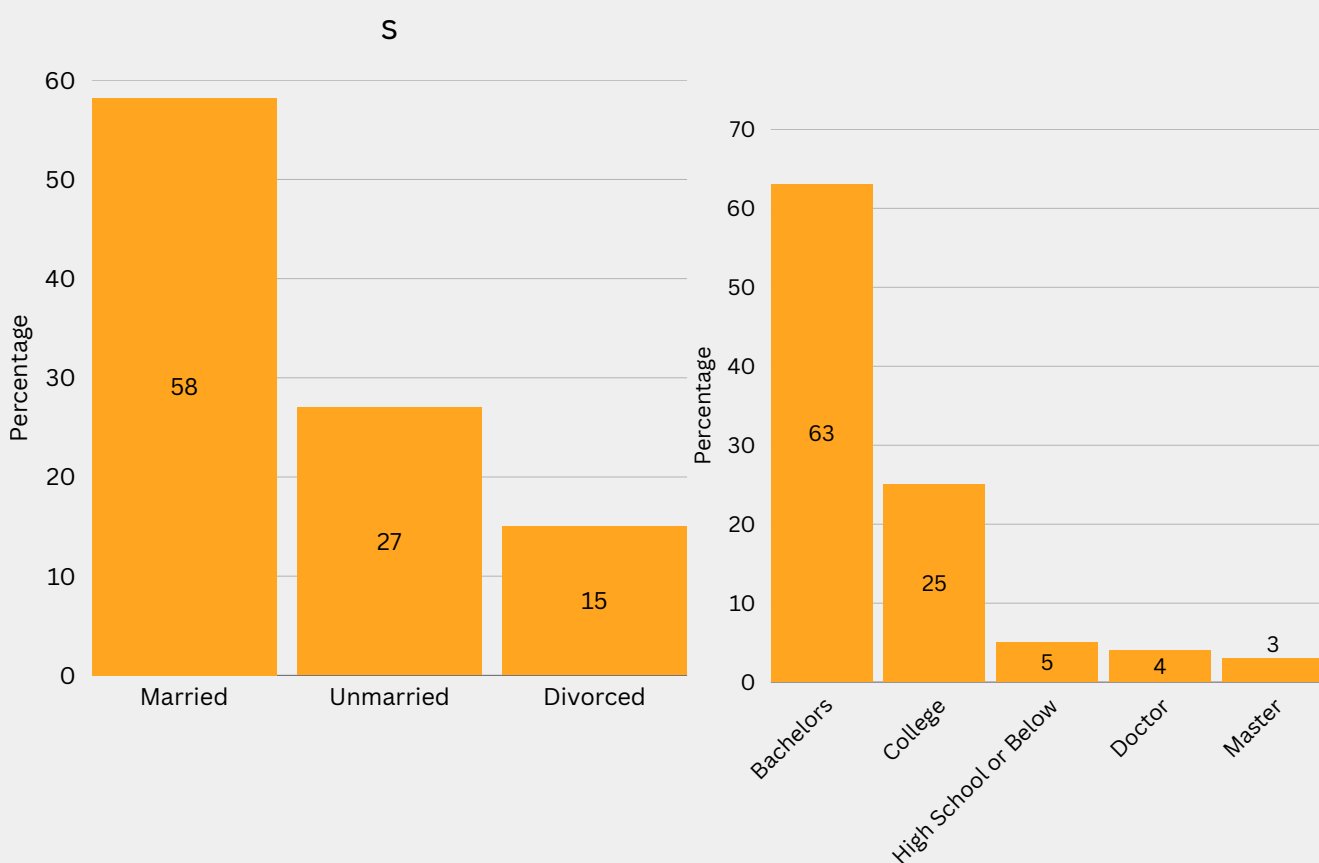

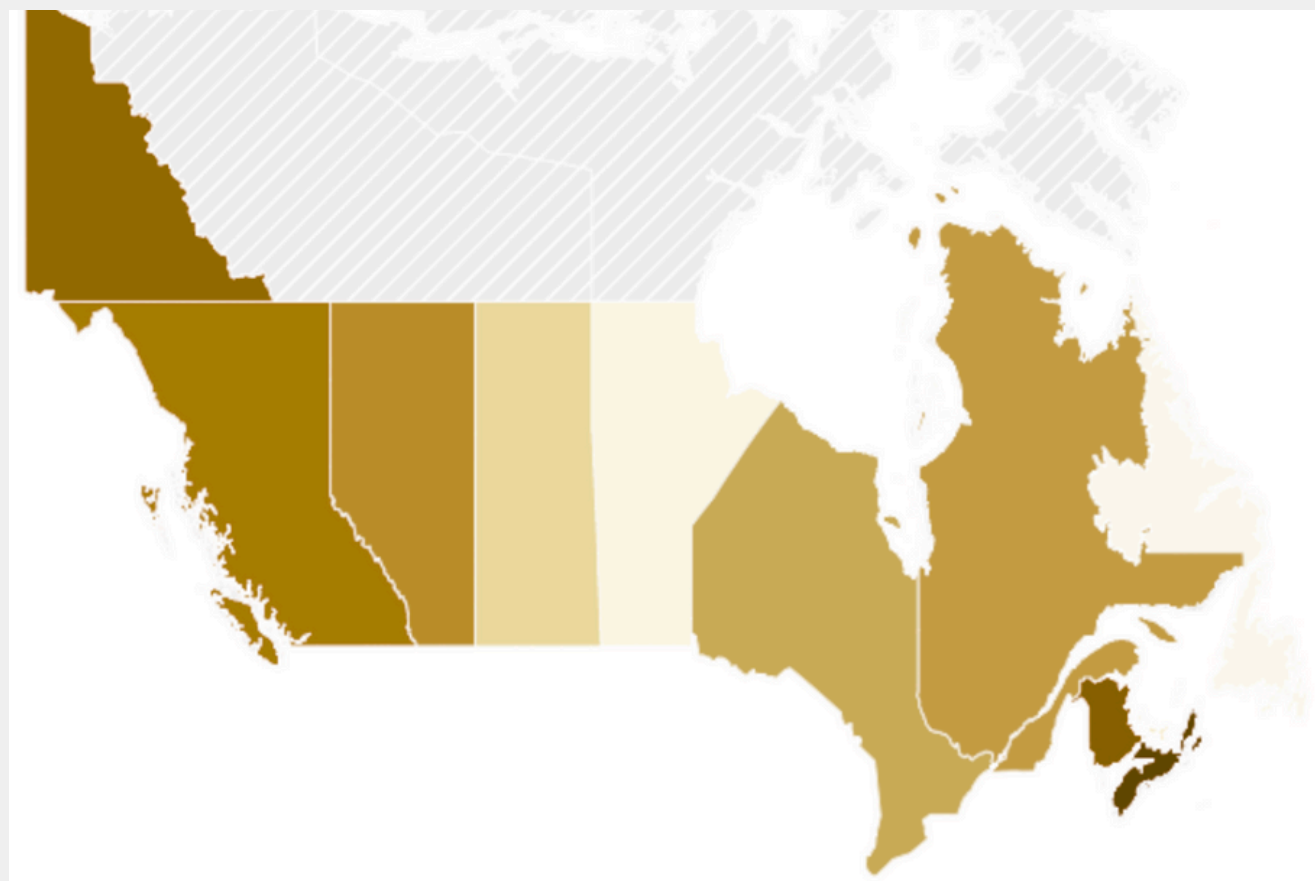

INTRODUCTION:

This analysis provides the foundational insights needed to maximize AIAI's overall profitability and strategic return on investment. The data reveals AIAI's core profitable customer base is composed of highly educated, married individuals and most customers concentrated in three core provinces. Flights mostly taken are by the zero-income and lower-income (\$20K-\$40K) segments, with other tiers contributing comparatively less. Their recent surge in travel activity presents a critical window to solidify long-term loyalty.

KNOW YOUR CUSTOMERS

Customer's Profile: Our core customers are Highly Educated (63% hold a Bachelor's degree or higher). The majority of our customers are also Married (58%).

Recommended Action: Given their high education, customers are responsive to sophisticated, value driven loyalty offers. To capture the high margin Married segment, we must prioritize developing a Group/Family Booking Tool that simplifies their entire travel experience.

GEOGRAPHY SEGMENTATION: CORE MARKET PROFILE

Market Concentration: Our customer base is highly concentrated, with over 75% of all customers living in just three provinces: Ontario (ON), British Columbia (BC), and Quebec (QC).

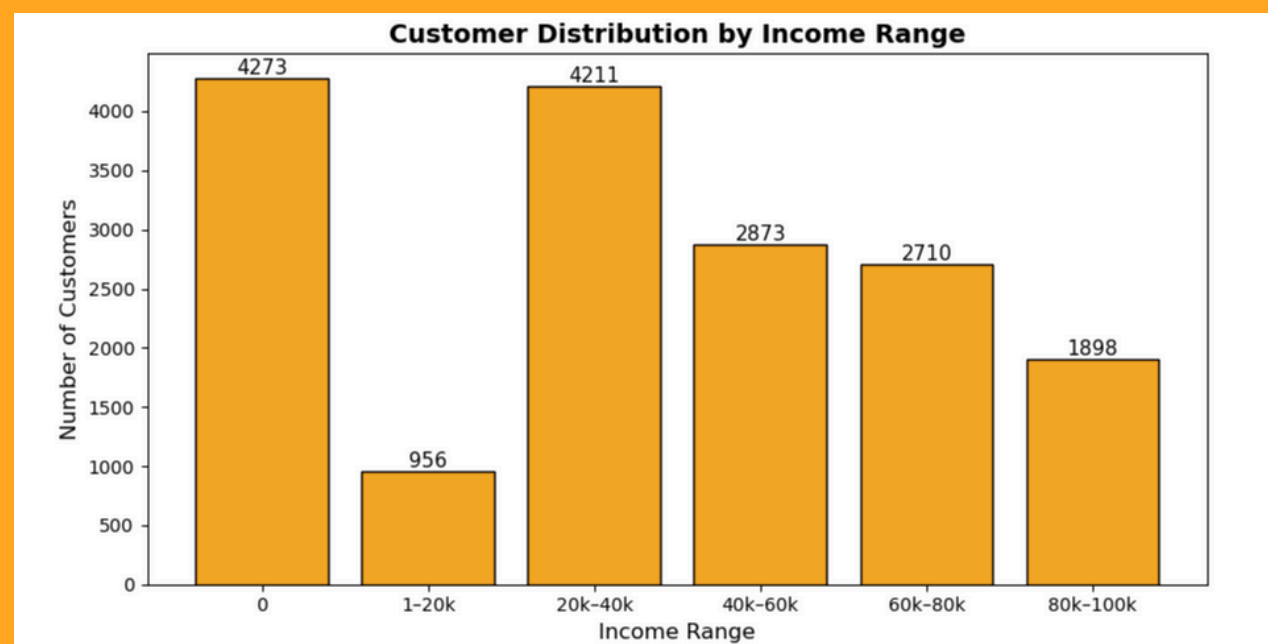

Strategic Priority: We need to prioritize and maximize marketing spending in those three core provinces (ON, BC, QC) because that's where most of our customers are. For all other provinces, we'll continue to run smart, focused campaigns to find and win new customers.

INCOME OF CUSTOMERS

Extreme Value Concentration & Future Pool:

Customer volume is concentrated in two major segments: the zero-income group and the \$20K-\$40K income range. A small fraction of customers are in the higher income brackets, representing the highest potential long-term value. A separate, large segment has zero reported income (potential students).

Strategic Priority: Dedicated Retention for high Income Customers. Use Loyalty Incentives to nurture the customers with low-mid range income.

ENGAGEMENT: CUSTOMER ACTIVITY IS SURGING

Engagement Momentum is High: Active travel rates have exceeded pre-2020 levels, creating a crucial window to solidify new customer habits.

Recommended Action: Start a focused promotion immediately to help these new, active customers quickly reach the next level of rewards. This is critical to lock in their long term loyalty while they are traveling frequently.
